PROFILE

I am a Full-Stack Developer, with emphasis on programming languages in both in Front-End (HTML, css, JavaScript, React, Redux, Tailwind css, Bootstrap) and Back-End (Express, Node.js), agile methodologies (SCRUM) and databases (SQL, sequalize). After studying international trade, I decided to make a career change and focus my job search on a position related to web development. That's why I'm interested in being part of an organization that allows me to contribute the different skills acquired throughout my education.
